

Becoming a vendor - FAQ/Information

Frankfurt, Germany, 02.02.2026

How to Upload Your Game (The 5-Minute Guide)

Getting your game on PnP Stash is designed to be fast and intuitive. We stripped away the complicated barriers so you can go from "Idea" to "Published" in minutes.

Step 1: Register as a Vendor

- Go to the Registration Page.
- Select "I am a Vendor" (or "Apply to become a Vendor").
- Fill in your store name and details.
- *Tip: Add a profile picture and banner to make your shop look professional immediately.*

The screenshot shows the PnP Stash website with a registration modal open. The modal has a 'Sign in' link and a 'Sign up' link. The 'Sign up' section includes fields for Email address, First Name, Last Name, Shop Name, Shop URL (with a pre-filled example), and Phone Number. Below these fields are radio buttons for 'I am a customer' and 'I am a vendor', with 'I am a vendor' selected. A red 'Register' button is at the bottom right of the modal. The background shows the website header with 'Board Games' and 'Card Games' links, and a search bar.

Sign in **Sign up**

Phone Number*

☐ I am a customer ☒ I am a vendor

Register

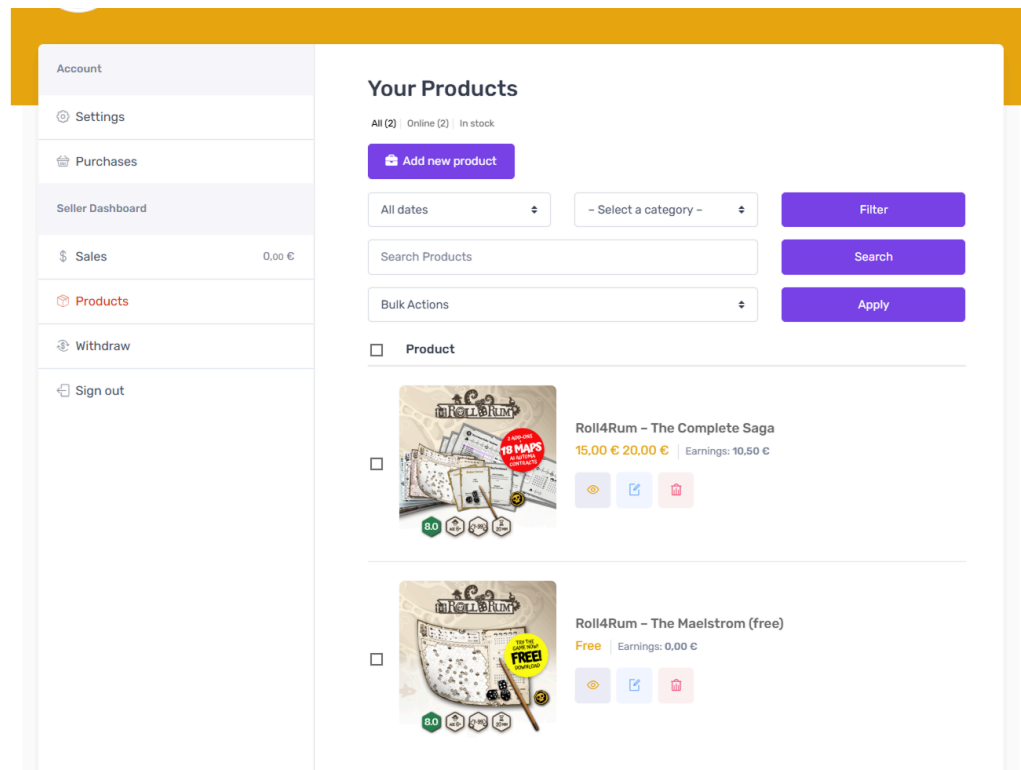

Step 2: Enter Your Dashboard

- Once logged in, click on the user/vendor icon on the top right to get to your "Vendor Dashboard".
- This is your mission control. Here you can see your sales, earnings, and manage your games.

Step 3: Add a New Product

- Click Products -> Add New Product.
- Title: Give your game a clear name.
- Price: Set your price (or leave it at 0 for free games).
- Cover Image: Upload a high-quality main image (Square, min 512x512 px). This is the first thing players see—make it count!

Step 4: The Important Details

- Description: Tell players what the game is about. What is the hook?
- Categories & Tags: This is how players find you. Select the correct Player Count, Play Time, and Mechanics.
 - Note: Categories are live; detailed tagging is coming soon!

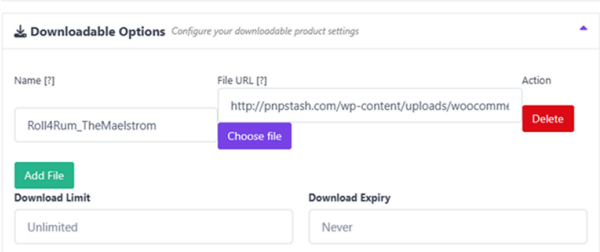

IMPORTANT: Make sure to check the box at "downloadable" to be able to upload!

- Downloadable Files: Upload your PDF game files here (max 128MB per file - you can add multiple files).
 - Pro-Tip: Clearly label your files (e.g., "Game_A4.pdf" or "Game_LowInk.pdf").

The screenshot displays the 'Edit Product' interface on the PnPstash website. On the left is a sidebar with navigation links: Account, Settings, Purchases, Seller Dashboard, Sales (0.00 €), Products, Withdraw, and Sign out. The main content area is titled 'Edit Product' with an 'Online' status indicator and a 'View Product' button. The product being edited is 'Roll4Rum - The Maelstrom (free)'. The form includes a 'Permalink' field with the URL <https://pnpstash.com/product/roll4rum-the-maelstrom-free/>. The 'Downloadable' checkbox is checked, while 'Virtual' is unchecked. The 'Category' is set to 'Roll & Write'. The 'Price' is 3 € and the 'Discounted Price' is 0 €. The 'Brand' and 'Tags' fields are currently empty. The 'Short Description' and 'Description' fields are both empty, each with a rich text editor toolbar. A product image is shown on the right, featuring a map and dice, with a 'FREE' badge. The product is currently in a draft state, as indicated by the 'Draft' label in the top right corner.

Step 5: Submit for Review

- Click "Create Product".
- The "Brief Check": To keep the platform safe and high-quality, we give every file a quick look over. We don't edit your text—we just ensure the files are safe and print-ready.
- Once approved (usually within 24 hours), your game is live!

The screenshot shows a web interface titled "Downloadable Options" with a subtitle "Configure your downloadable product settings". It features a table with three columns: "Name [1]", "File URL [1]", and "Action". The first row contains the text "Roll4Rum_TheMaelstrom" in the Name column, "http://pnpstash.com/wp-content/uploads/woocomm" in the File URL column, and a "Delete" button in the Action column. Below the table, there is a green "Add File" button. At the bottom, there are two sections: "Download Limit" with a dropdown menu set to "Unlimited", and "Download Expiry" with a dropdown menu set to "Never".
